- **Maintain Clean Grounds:** The cleaner your ground is, the better the unit will operate. If you can, **moist and blow it prior to cleanup.**

- **Loose Wheels (Shells aren't being caught in wheels):** If you have loose wheels [A], use a 7/16" deep well socket wrench to tighten wheel drum located on the sides of the machine [J].
- **Loose Fingers:** If you have loose fingers, apply spacers to the finger shaft [D].
